Block 1

To complete their curriculum, students must earn or validate the 75 credits of the compulsory courses (including the master thesis and Internship), choose one of the two professional foci (30 credits) and choose optional courses for 15 credits. Ideally, students enrolling in the master program should have acquired the skills and knowledge corresponding to the 40 credits in "Energy" offered as part of the bachelor program in engineering.

Optional courses from the core curriculum

Choose courses totalling 15 ECTS out of the following :

[...] Remark : Electives may also be replaced by one or more courses from the undergraduate "energy" option for which competencies would not be acquired. The courses ELEC0053-2 and SYST0022-1 are corequisite to some compulsory courses of the master program. They must be taken prioritarily, unless they were already taken as part of the bachelor in engineering, or unless the corresponding knowledge and skills have been acquired previously.
